Infidelity to the noiseless state, depolarizing, h = 1.0, all N and p
$1 - \langle\psi_0|\rho|\psi_0\rangle$
noise strength p
error budget $\lambda = p\,(n_{1q} + n_{2q})$
HVA N=8 p=1
HVA N=8 p=2
HVA N=8 p=3
HVA N=8 p=4
HEA N=8 p=1
HEA N=8 p=2
HEA N=8 p=3
HEA N=8 p=4
$1 - e^{-\lambda}$
