Training under noise, N = 8, p = N/2, h = 1.0, 10000 shots per basis (dotted: cold floor at zero noise)
HVA, depolarizing
HEA, depolarizing
HVA, amplitude damping
HEA, amplitude damping
HVA, dephasing
HEA, dephasing
A: noiseless optimum under noise
B: warm start, trained under noise
B: cold start (median)
ϵ
noise strength p
