(a)
$P(h)$, logistic regression
h/J
$N = 4$
$N = 6$
$N = 8$
$N = 10$
$N = 12$
$N = 14$
(b)
h_c^{ML}/J
$1/N$
free fermions, exact
ED, exact features
PCA midpoint
ED, shadows
(c)
h_c^{ML}/J, trained on ED
N
ED, same N
HVA, $p = N/2$
HVA, $p = N$
HEA, $p = N/2$
HEA, $p = N$
