
(a)
depolarizing
HVA
HEA
$1 - e^{-\kappa\lambda}$, $\kappa = 0.73$
$1 - F_{\text{ideal}}$
error budget $\lambda = p\,(n_{1q} + n_{2q})$
(b)
amplitude damping
HVA
HEA
$1 - e^{-\kappa\lambda}$, $\kappa = 0.36$
$1 - F_{\text{ideal}}$
error budget $\lambda = p\,(n_{1q} + n_{2q})$
(c)
dephasing
HVA
HEA
$1 - e^{-\kappa\lambda}$, $\kappa = 0.32$
$1 - F_{\text{ideal}}$
error budget $\lambda = p\,(n_{1q} + n_{2q})$
